

# Modernize Training with ServiceNow

Faster, Cheaper, with Fewer Resources

Companies are always expected to do things faster, cheaper, and with fewer resources.

Then there are the ever-present business threats and regulations that require workforce training.

**Learning Management Systems (LMS)** have been traditionally used to overcome such challenges, but now there's always another system, a new interface, and custom integrations to build just to manage data. These systems are usually resource-intensive and only serve to further confuse the already bewildering mix of apps.

### **Learning Management at the Speed of NOW!**

PlatCore simplifies and automates the traditional LMS. This revolutionary LMS software is built on the industry-leading Now Platform™ from ServiceNow.

*“I have not had a better experience installing and integrating a major piece of software!”*

*“The PlatCore LMS takes something complex and makes it easy and intuitive. In addition, they provide unmatched support.”*
